DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 2, 4-7, 9, 11-17, 19, 21-26, 28, 30-35, 37, and 39-44.

Allowable Subject Matter

Claims 1, 3, 8, 10, 18, 20, 27, 29, 36, 38 are allowed.

The following is an examiner's statement of reasons for allowance:

The Examiner conducted an after final interview with the Applicant who argued persuasively that the Nakamura reference taught the O, N and rare gas (noble gas) concentrations for the first semiconductor layer and not the second as recited in independent claims 1 and 3. Upon further search, it is noted that Shibata et al (US 6897477 and US 20050247940 A1) and Yamazaki et al (US 20020043660 A1) teach a similar method however still fail to teach a second amorphous layer having the combination of O, N, and noble gas concentrations as recited in claim 3. Applicant further asserted that as explained in the specification, such concentrations produced superior results. Consequently, claims 1 and 3 are allowable over prior art. Claims 8,

10, 18, 20, 27, 29, 36, 38 depend from allowed claims 1 and 3 and act only to further narrow the allowable subject matter found therein and are therefore also deemed to be allowable over prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
